
ATSF Early Tank Car Decal Sets Available

Friends

This to announce an offering of lettering sets that cover the HO scale Tk- G through J classes of ATSF brass tank cars imported by Pecos River Brass. Those models were imported in the mid 1980's and considered by many to be some of the most beautiful brass freight models ever produced. The problem is that there are currently few if any commercially available decal sets to accurately letter these models.

This newly developed set was produced by myself and the artists at Rail Graphics following the specifications and guidance contained in the "Santa Fe Railway Painting and Lettering Guide". The set features:

- accurate, crisp, and properly scaled RR Roman all white lettering (see attached sample)
- relevant capacities, service and build dates, test data, and class designations.
- reporting marks consistent with Santa Fe number series for Tk-G through J class tank cars.
- intentional spread of side reporting marks to clear tank bands
- two sheets in each set for lettering up to two cars (maybe three) in different configurations as photo documentation suggests they would have appeared in the late 30's through late 50's.

Limited Supply!

Price is \$ 7.50 per set and includes shipping.
